Our Clients

Engineering Plastic

Semi-finished plastic for paddings, replacement parts (metals or other materials), reducing friction agents, or chemical resistance application.

01

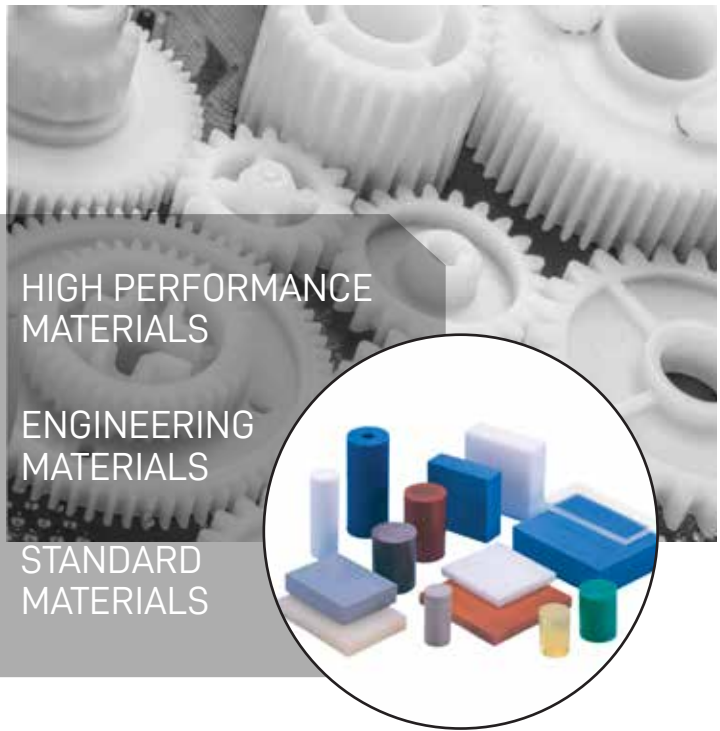

HIGH PERFORMANCE MATERIALS

02

ENGINEERING MATERIALS

03

STANDARD MATERIALS

UHMW-PE

PP

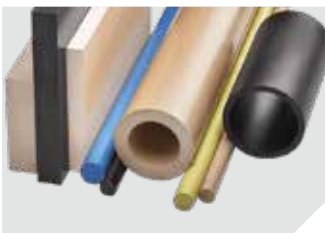

POM

MC NYLON

PEEK

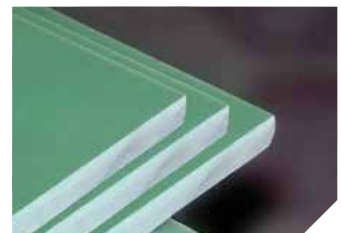

PTFE (TEFLON)

PPSU

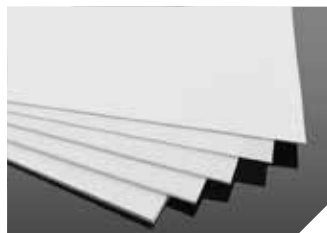

EPOXY

PVDF

ABS

PVC

Chemical MRO

Cleaning, lubricating, penetrating, rust inhibitors, sealing, and other applications chemicals are needed in the industries.

- ▶ Cleaner
- ▶ Lubricant
- ▶ Food Grades
- ▶ Rust Inhibitors
- ▶ Sealant & Adhesives
- ▶ Automotive
- ▶ SmartWasher

Architecture Materials

Shade Cloths and Polycarbonate are where the future solutions for ergonomic and aesthetic roofing materials and shadings.

SKYWALL®

- 01 PC SOLID
- 02 MULTIWALL SYSTEM
- 03 DIFFUSION SHEET

Composite Material

PTFE Coated Fabric to enhance its performance under pressure, high temperature, and friction. Varies from Adhesive tapes, conveyor belts and silicone coated materials.

TACONIC

ADHESIVE TAPE

BAKING LINER

PTFE MESH

PTFE FABRIC

FUSING BELT

2 PLY BELT

Castor & Wheels

Wheels used for industrial, light, medium, and heavy duty applications, such as airport trolley, wagon, fork lift, etc.

01 | STRONG

02 | DURABLE

Carbon Graphite

Consists of mechanical seals, carbon brush, vane, along with holders, carbon bushings, segments, cables, and other carbon related materials.

- ▶ International support, including experts from Australia and Germany
- ▶ Product variations with international standard material quality
- ▶ Various kinds of products
- ▶ Fast Turnaround Time
- ▶ Professional Technical Support
